

Spring Training 2010

March 20 to May 21

How active are you in the DEN? We know what your agent tells us, but we want to see your stats. On the next two pages are twenty challenges that test whether you are still working your way up from the Grapefruit League or if you are ready for Cooperstown.

Take a look and then calculate your own DEN Activity Level (DAL) using the following formula.

Add up the total number of STARS earned and divide by 42. Multiply this number by 23. The result is your DAL.

Hall of Famer

(21-23)

All Star

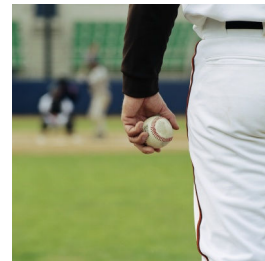

(18-20)

Major Leaguer

(12-17)

Minor Leaguer

(7-11)

Two Special Spring Training Signing Bonuses

1

After you calculate your DAL host an event on your home field and share some of the 20 challenges with your teammates. You don't have to share them all, but your DEN coaches certainly would be impressed if you did.

Then report your DEN Spring Training event and receive a set of three DEN recycling bags perfect for creating a recycling station in your classroom.

2

Pad your stats by uploading at least one resource to the DEN Educator Resources library. Tell us what you uploaded, give us your uniform size and we'll send you a Discovery Education "Beyond the Textbook" t-shirt.

Report your event and/or resource at:
